

The evolution of the Christ consciousness . . .

The evolution of the Christ consciousness in your world depends upon human will to attain a state of higher consciousness. It is no good to say this is the age of Aquarius and then do nothing. Higher consciousness requires the attunement of the human will to the higher vibration. One must "tune in" so to speak in order to open to the higher consciousness that is indeed accessible now to all who seek to reach that level.

You remember the saying: "Gentlemen may cry 'Peace, peace,' but I say there is no peace." Unless you are peaceful within yourselves and not always at war within and with each other, there will be no peace.

Peace is an inner state that radiates outward. It is not something that can be imposed for as long as the human mind is attuned to the transient ego, it will remain controlled by whim, by moods of anger and dissatisfaction.

Peace requires your attention, your willingness to give it your attention each day with each thought, each movement. Each gesture that you make must be filled with peace, the peace that fills you when your mind and heart are attuned to the One God, attuned to the Oneness of All Beings, the Oneness of all Things. Until your heart is open to the reality of Oneness, you will never attain peace.

True peace begins with willful thought, trained on the possibility of total Oneness, of total peace and as that thought expands, saturating every atom of your being, peace enters in.

There is no more profound thought than this – the Oneness of all Creation. Center yourself in this thought. Expand your soul until it merges into the dewy mist of life. See how profoundly you are made and how deeply you are connected with all that is and all that ever was.

Expand your Being to touch the Heart of the Almighty and there in profound love, dwell. There you can know no fear, no hunger, no anger for all is satisfied in the Love of the Almighty. There is nothing else. Saturate every cell of your Being with the Love of the Almighty.

No more profound feeling exists in all of Creation. Let yourself be absorbed into the Christ Consciousness that pervades all Creation. Be lifted up into the profound wisdom of who you are. No greater Wisdom is there than this.

It is the understanding of heart, mind and soul of who you truly are and whose you truly are for you belong to the Wisdom of the Universe, the Heart of All Creation, the Center of the Universal Mind. There is no more profound experience than this.

Remember. Remember. Remember.
